Art Unit: 1795

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-18 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over EP 1260498. EP'498 (paragraphs 266,272-277,282,284,286,288; examples 1,24) discloses compositions of urea-urethane developers which are heat treated at 60 degrees C or lower. Examples 1 and 24 also have Ca carbonate as set forth in instant claim 7. Al oxide and Mg silicate may also be optionally present. Acid developers may also be optional present. It would at least be obvious to one skilled in the art to use the optional acidic developers, Al oxide or Mg silicate and to use heat during the disclosed grinding. The compositions of the instant claims are substantially the same as those of EP '498 even without heating in EP '498 since applicants' specification on page 30 discloses that heating at temperatures above 40 degrees for at least 3 hours is necessary to produce substantial change in the urea-urethane compositions while the instant claims include heating at lower temperatures for any period of time and claims 4, 6, 7 and do not require any heating.
